

Product

Product name	wrappon trekker WT-4
Model No.	WT4SE002JH
Dimensions	Assembled: 390 mm (W) × 460 mm (D) × 400 mm (H) Stored: 390 mm (W) × 460 mm (D) × 270 mm (H)
Weight	Main unit: Approx. 12 kg, AC adapter: Approx. 600g
Materials	Body and legs: aluminum alloy; Seat: polypropylene
Power supply	AC 100V, 50 or 60 Hz, or DC 12V
Power consumption	75W (battery operable / not included in the price)

Consumable Supplies

Product name	Katameru polymer special coagulant
Model No.	C0C0P001J
Material	Highly water-absorbing polymer (1box, 425g, 113(H)×106(W)×95(D), contains 50 bags)

Katameru polymer special coagulant

Product name	Film roll
Model No.	C0F150C1J
Material	Odor-sealing polyethylene film with a 5-layer structure (approx. 50 uses)

Film roll

Product name	Moist tissue
Model No.	C0WT0002J
Material	Flushable, alcohol-free, unscented (1 bag contains 100 sheets)

Moist tissue

Option & Accessory

Optional Power Supply

Product name	Handy Battery	Model No.	BALPHB01JH
Battery capacity	60W	Weight	Approx. 650 g
Dimensions	204 mm (W) × 66 mm (D) × 25 mm (H)	LED remaining charge indicator	5-level indicator
Battery	Lithium-ion polymer battery	Voltage output	DC 12V
Charging time	Approx. 2 to 4 hours *Number of uses per charge: 50 to 60 (when used continuously)	USB output	DC 5V max 1,000 mA

Handy Battery

Product name	DC cable Type B	Model No.	COCCB10MS
Specifications	12V for use with a vehicle Equipped with a power supply switch	Length	10m

DC cable Type B

Armrest frame

Product name	Raku-arm WR-3
Model No.	WR3AR001JH
Dimensions	570 mm (W) × 570 mm (D) × 820 mm (H) Arm height: 615mm Backrest height: 820mm
Weight	Approx. 8kg
Materials	Pipes: steel; Handrails: Elastomer

Prefabricated Room

Product name	danbee WD-3
Model No.	WD3DH001JH
Dimensions	Assembled: 980 mm (W) × 930 mm (D) × 1805 mm (H) Stored: 1090 mm (W) × 1100 mm (D) × 130 mm (H)
Weight	Approx. 11kg
Materials	Walls: Corrugated paper board; Floor and ceiling: corrugated plastic; Screws: plastic

Agent

Auto-wrapping (tear-and-seal) portable toilet

wrappon **TREKKER** WT-4

NIHON SAFETY CO.,LTD.

Auto-wrapping with no smell and no hustle!

This innovative portable toilet based on an entirely new concept wraps and completely seals in waste and odors without using any water. Operation is clean and sanitary because waste is wrapped after each use. During an emergency, this toilet can be powered using a dedicated battery or the cigarette lighter socket of a vehicle. The functionally enhanced automatic wrapping toilet Wrappon Trekker WT-4 can be used in any situation during everyday life or emergencies. A clean and safe toilet environment is crucial! Let us show you how the Wrappon can help you.

The Japanese Technologies

1 Automatic wrapping mechanism

The automatic wrapping system developed by Nihon Safety uses thermocompression bonding to hermetically seal waste after each use (*1) without the use of water. Since waste is individually wrapped and the soiled film is cut away after each use, the Wrappon Trekker WT-4 remains clean and is easy to maintain.

3 Lightweight, compact, and portable

The main unit is composed of an aluminum alloy that does not rust easily even if scratched, and is therefore easy to maintain. The Wrappon Trekker WT-4 is lightweight and portable. It also folds into a compact shape when not in use.

2 Deodorizing film to keep smell and bacteria inside

The special deodorizing film can keep smell and bacteria inside. It can stop a secondary infection as the film wraps and seals human waste and vomit inside completely.(*2) This special film is made of polyethylene so it does not produce any harmful gas when burning. The wrapped film can be disposed same as diapers. (*3)

4 Optional items are available at the time of emergency

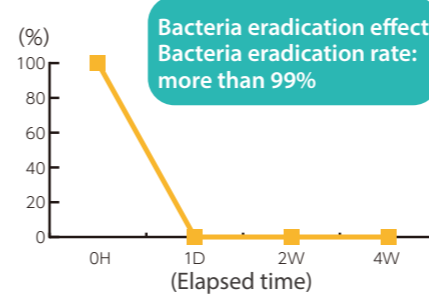

When you cannot use the electricity at the time of blackout, you can use our optional items. Small and compact size lithium-ion polymer battery and DC cable for use with a vehicle are available for easy and safe connection to the Trekker WT-4.

5 Reliable test data for the special film and special coagulant

We conducted various tests of the wrapped film to check if the film can block the smell and bacteria. The charts below indicated effectiveness of blocking smell and bacteria.

Bacteria eradication effect (coliform group)

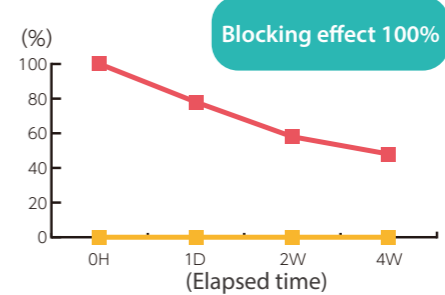

■ Polymer coagulant + special film

* Based on our data * Test results were with undamaged films

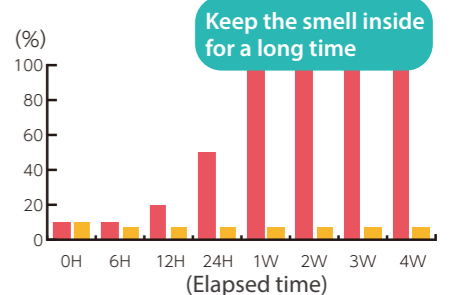

Blocking effect (group)

■ Bacteria inside the film
■ Bacteria outside the film

Deodorizing effect (hydrogen sulfide)

■ Without polymer coagulant + PE film
■ With polymer coagulant + special film

6 Easy to use

Adding the special coagulant

After pouring the special coagulant, you finish the defecation. The special coagulant is to absorb the moisture from urine and human waste.

Pressing the remote control button

When finished, press the button on the remote control unit. It automatically rolls the deodorizing film and starts wrapping the urine and human waste. Then, the film is sealed and cut without being touched by hands.

Removing the wrapped film

The wrapping cycle is completed after 90 seconds when you hear the completed sounds as beep, beep. Then, just pull out the bottom tray and take it out.

*1 It is recommended that the wrapped film be disposed soon as the film cannot conceal smell for a long period of time. *2 Wrappon Trekker WT-4 cannot conceal infectious disease 100%. *3 Refer and consult with the local government for the dispose of the wrapped film as the policies vary depending on the local government.
