**Product**

Product name: *Wrappon Trekker WT-4*

**Model No.** WR40002

**Dimensions**
- Assembled: 1490 mm (W) × 650 mm (D) × 370 mm (H)
- Stored: 660 mm (W) × 450 mm (D) × 270 mm (H)

**Weight**
- Main unit: Approx. 12 kg, AC adapter: Approx. 600 g

**Materials**
- Body and legs: aluminum alloy, Seat: polypropylene

**Power supply**
- AC 100 V, 50 or 60 Hz, or DC 12 V

**Power consumption**
- 75 W (battery operable, not included in the price)

**Consumable Supplies**

- **Film roll**
  - Product name: C0F150C1J
  - Material: Odor-sealing polyethylene film with a 5-layer structure (approx. 50 uses)

- **Moist tissue**
  - Product name: C0WT0002J
  - Material: Flushable, alcohol-free, unscented (1 bag contains 100 sheets)

- **Katameru polymer special coagulant**
  - Product name: C0CCP001J
  - Material: Highly water-absorbing polymer (1 box, 425 g; 1 box = 150 ml × 2.5 times; contains 50 bags)

- **Armrest frame**
  - Product name: Raku-arm WR-3
  - Model No. WR3AR001JH
  - Weight: Approx. 8 kg
  - Dimensions: 570 mm (W) × 570 mm (D) × 820 mm (H)
  - Arm height: 615 mm
  - Backrest height: 820 mm
  - Materials: Pipes: steel; Handrails: Elastomer

- **Prefabricated Room**
  - Product name: Danbee WD-3
  - Model No. WD3DH001JH
  - Weight: Approx. 11 kg
  - Dimensions: Assembled: 980 mm (W) × 930 mm (D) × 1805 mm (H)
  - Stored: 1090 mm (W) × 1100 mm (D) × 130 mm (H)
  - Materials: Walls: Corrugated paper board; Floor and ceiling: corrugated plastic; Screws: plastic

**Option & Accessory**

- **Optional Power Supply**
  - Product name: Handy Battery
  - Model No. WAPHB001J
  - Capacity: 44Wh
  - Dimensions: 204 mm (W) × 66 mm (D) × 25 mm (H)
  - Weight: Approx. 450 g
  - Materials: Lithium-ion polymer battery
  - Voltage: DC 12 V
  - Output: DC 5 V max 1000 mA
  - Specifications: USB port

  - **DC cable Type B**
    - Length: 2m

After pouring the special coagulant, you finish the defecation. The special coagulant is to absorb the moisture from urine and human waste. When finished, press the button on the remote control unit. It automatically rolls the deodorizing film and starts wrapping the urine and human waste. Then, the film is sealed and cut without being touched by hands.

Auto-wrapping with no smell and no hustle!

This innovative portable toilet based on an entirely new concept wraps and completely seals in waste and odors without using any water. Operation is clean and sanitary because waste is wrapped after each use. During an emergency, this toilet can be powered using a dedicated battery or the cigarette lighter socket of a vehicle. The functionally enhanced automatic wrapping toilet Wrappon Trekker WT-4 can be used in any situation during everyday life or emergencies. A clean and safe toilet environment is crucial! Let us show you how the Wrappon can help you.

We conducted various tests of the wrapped film to check if the film can block the smell and bacteria. The charts below indicated effectiveness of blocking smell and bacteria.

Bacteria eradication effect (coliform group) Blocking effect (group) Deodorizing effect (hydrogen sulfide)

* Based on our data  ** Test results were with undamaged films

** Reliable test data for the special film and special coagulant**

**5 Easy to use**

Adding the special coagulant

After pouring the special coagulant, you finish the defecation. The special coagulant is to absorb the moisture from urine and human waste.

Pressing the remote control button

When finished, press the button on the remote control unit. It automatically rolls the deodorizing film and starts wrapping the urine and human waste. Then, the film is sealed and cut without being touched by hands.

Removing the wrapped film

The wrapping cycle is completed after 90 seconds when you hear the completed sounds as beep, beep. Then, just pull out the bottom tray and take it out.

1 **Automatic wrapping mechanism**

The automatic wrapping system developed by Nihon Safety uses thermocompression bonding to hermetically seal waste after each use (*1) without the use of water. Since waste is individually wrapped and the soiled film is cut away after each use, the Wrappon Trekker WT-4 remains clean and is easy to maintain.

2 **Deodorizing film to keep smell and bacteria inside**

The special deodorizing film can keep smell and bacteria inside. It can stop a secondary infection as the film wraps and seals human waste and vomit inside completely (*2). This special film is made of polyethylene so it does not produce any harmful gas when burning. The wrapped film can be disposed same as diapers (*3).

3 **Lightweight, compact, and portable**

The main unit is composed of an aluminum alloy that does not rust easily even if scratched, and is therefore easy to maintain. The Wrappon Trekker WT-4 is lightweight and portable. It also folds into a compact shape when not in use.

4 **Optional items are available at the time of emergency**

When you cannot use the electricity at the time of blackout, you can use our optional items. Small and compact size lithium-ion polymer battery and DC cable for use with a vehicle are available for easy and safe connection to the Wrappon WT-4.

5 **Reliable test data for the special film and special coagulant**

We conducted various tests of the wrapped film to check if the film can block the smell and bacteria. The charts below indicated effectiveness of blocking smell and bacteria.

*1 It is recommended that the wrapped film be disposed soon as the film cannot conceal smell for a long period of time. *2 Wrappon Trekker WT-4 cannot conceal infectious disease 100%. *3 Refer and consult with the local government for the dispose of the wrapped film as the policies vary depending on the local government.
